COAL MINE TO BE ELECTRIFIED

40 PERCENT OF WORK COMPLETED -- Tirana, Bashkimi, 1 Aug 50

Korce, 31 July (Albanian Telegraphic Agency) -- At the beginning of July, the workers and technicians of the state electrical industrial enterprise of the city of Korce began work on a project to conduct electricity to the Mborje Drenove coal mine and to electrify it throughout.

Thus far 40 percent of the work has been done. Post holes have been dug and poles transported for the distance of 6 kilometers between the power source and the mine. The erection of poles to carry the power lines has just begun.

The project of conducting power to the mine is expected to be completed by the end of this month.

When power is available to the mine, ventilators will be installed at once. Two electric compressors will be installed later. These additions will greatly increase production at the mine.

STILL ADDED AT KUCOVE -- Tirana, Zeri i Popullit, 16 Jul 50

Kucove -- Work began a few days ago on the construction of Distillery No 3 at the Workshop in Kucove. This important still will further increase the Workshop's capacity for the production of petroleum, gasoline, bitumen, and other products.

Thus far preparations have been made for leveling the site of the distillery and for delivering the boilers which have arrived from the USSR.
